Summary

Computer Science graduate with a strong focus on Artificial Intelligence, Data Science and hands on experience in Data Analytics, Web Development, and SQL-based data handling. Proficient in Python, with practical knowledge of machine learning, data analysis, and problem solving. Experienced in working with real world datasets, performing data cleaning, visualization, and building interactive dashboards using Power BI. Skilled in developing responsive web applications and applying analytical thinking to solve complex problems. Experienced in internships across software development and IT operations, demonstrating strong problem solving skills, adaptability, and continuous learning. Seeking opportunities in AI, Data Science, Data Analytics or Software Engineering roles within growth oriented organizations.

Education

Bachelor of Science in Computer Science 2022 – 2026
University of Agriculture, Faisalabad

Technical Skills

AI & Data Science: Machine Learning, Data Analysis, Data Preprocessing, Data Visualization

Languages: Python, SQL, JavaScript

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Data & Analytics Tools: Power BI, Tableau, Excel

Frameworks / Technologies: React.js, Next.js

Databases: MySQL, MongoDB

Tools: Git, GitHub

Core Strengths: Problem Solving, Analytical Thinking, Team Collaboration, Communication

Experience

Information Technology Intern Jun 2025 – Aug 2025
Fatima Memorial System, Lahore

- "Developed frontend interfaces and features based on hospital operational requirements."
- Worked with Oracle SQL and Excel to manage, clean, and analyze operational data.
- Assisted in IT operations workflows, working with HIS Software.

Web Developer Intern (MERN Stack) Feb 2025 – May 2025
Gamica Cloud, Faisalabad

- Developed responsive frontend components using React and JavaScript.
- Implemented reusable UI elements following modern web and UX standards.
- Strengthened core concepts of full-stack development through project based learning.

Projects

MotionGuard: AI-Driven Security & Vision Analytics (Python, YOLOv8) — [Project Link](#)

- Developed an AI-based security system utilizing the YOLOv8 framework for real-time shoplifting detection and video analysis.
- Engineered custom threat-score logic and real-time monitoring to translate raw visual data into actionable security insights.
- Refined model accuracy through iterative logic training and technical troubleshooting to ensure reliable incident detection.

E-Commerce Sales Analysis & Forecasting (Power BI) — [Project Link](#)

- Analyzed e-commerce sales data to identify trends, seasonal patterns, and performance metrics.
- Designed an interactive Power BI dashboard with KPIs, filters, and drill down insights.
- Applied time series analysis techniques to forecast future sales and support data driven decision making.

Supplier Performance Dashboard (Tableau) — [Project Link](#)

- Developed an interactive Tableau dashboard to evaluate supplier efficiency and delivery performance.
- Used calculated fields and visual analytics to highlight bottlenecks and underperforming suppliers.
- Enabled business users to compare suppliers and improve procurement decisions.

Operations Analysis & Dashboard (Excel) — [Project Link](#)

- Performed data cleaning and preprocessing by handling missing values, duplicates, inconsistent formats, and data quality issues across multiple operational datasets.
- Applied advanced Excel formulas, Pivot Tables, conditional formatting, and statistical analysis to evaluate sales, inventory, employee, logistics, and return performance.
- Designed a dynamic Excel dashboard with KPI cards, interactive slicers, trend analysis, inventory monitoring, shipment performance tracking, and return analysis to support business decision making.

Online Shopping Web Application (Next.js) — [Project Link](#)

- Built a responsive shopping web application using Next.js and JavaScript.
- Implemented cart functionality, dynamic routing, and API integration.
- Focused on performance optimization, reusable components, and modern UI practices.

Certifications & Training

- AI & DataScience Course (NAVTTTC)
- Python Programming
- Analyzing and Visualizing Data with Microsoft Power BI
- Tableau Data Visualization Workshop
- Generative AI Fundamentals
- Mern Stack Development
